SUMMARY

Backend-focused Full Stack Developer with experience building scalable REST APIs, authentication systems, and database-driven applications using Node.js, Express, MongoDB, PostgreSQL, and Redis. Experienced in integrating AI APIs and building real-time applications using Socket.io. Looking for Backend / SDE roles.

EDUCATION

Computer Science Engineering – B. E

Sant Gadge Baba Amravati University | 2023 – 2026

Computer Engineering - Diploma

Government Polytechnic, Achalpur | 2020 – 2023

EXPERIENCE

Full Stack Developer (Remote / Part-time)

CarriBiz Global Logistics Pvt. Ltd, | Aug 2025 – Mar 2026

- Built and maintained scalable REST APIs using Node.js and Express for transactions, partner management, and service configuration.
- Designed PostgreSQL schemas using Prisma ORM and improved query performance through indexing and query optimization.
- Developed a financial processing system handling payouts, refunds, and transaction updates with consistent and reliable data handling.
- Implemented a “Cash Now, Pay Later” system to manage user credit, track balances, and automate repayment workflows.
- Built a partner online/offline system using Redis (24-hour TTL) to manage active sessions, with database fallback to maintain stability during cache failures.
- Secured backend systems using JWT authentication and role-based access control (RBAC) for admin operations.
- Added Two-Factor Authentication (2FA) for super-admin accounts using TOTP protocols to prevent unauthorized access to sensitive financial records.
- Reduced API response time by 25–30% through query optimization and Redis caching.

Frontend Developer Intern (Remote, India)

Manparth Pvt. Ltd | Feb 2025 – Apr 2025

- Worked on MERN stack features, contributing to frontend development and API integration.
- Built reusable and responsive UI components using React.js and Tailwind CSS.
- Integrated RESTful APIs, handled request/response data flow, and managed application state using Redux Toolkit.
- Assisted in debugging backend APIs, validating responses, and handling frontend-backend error scenarios.
- Collaborated with designers using Figma to implement pixel-perfect UI and used Git/GitHub for version control, pull requests, and team-based development workflows.

PROJECTS

Career AI – Resume Analysis & Job Matching Platform

- **Tech:** Node.js, Express, PostgreSQL, Prisma, Redis, Python NLP
- Developed a backend-driven platform that analyses resumes and matches them with job requirements using REST APIs built with Node.js and Express.
- Built a Python-based NLP module to extract skills and keywords from resumes, achieving 85% accuracy in skill identification.
- Designed PostgreSQL schemas using Prisma ORM and implemented Redis caching to reduce API response latency.
- Implemented JWT-based authentication and OAuth 2.0 and secure API endpoints for user data and resume insights.

Thoughtly - AI Thought Sharing Web Application

Live - <https://thoughtly.vercel.app/>

- **Tech:** MongoDB, Express, React, Node.js, OpenAI API, Socket.io
- Built a MERN-based social content platform allowing users to create and share ideas with secure authentication and role-based access control.
- Integrated OpenAI API to generate content suggestions, rewrite text, and automatically generate tags.
- Implemented real-time notifications and interactions using Socket.io for instant user engagement.
- Optimized MongoDB queries and schema design to improve feed retrieval performance.
- Improved feed performance by optimizing MongoDB queries and schema design.

TECHNICAL SKILLS

Language: JavaScript, Python

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Redis, Prisma ORM

Frontend: React.js, Redux Toolkit, Tailwind CSS

Databases: MongoDB, PostgreSQL

Other: Socket.io, OpenAI API, Git, Postman

ACHIEVEMENTS / HIGHLIGHTS

- Built and deployed 2 full-stack production projects with authentication and AI integration.
- Secured 1st place in a college-level project competition for developing an AI-based full-stack application.
- Designed backend systems with MongoDB, PostgreSQL, and Redis caching.
- Experience working in remote development environment with Git workflow.
- Strong focus on backend development and system design fundamentals.
